# Lab 2 - Exploring and working with postgresql

## Switch to the user created for postgresql in the previous lab

```
#To switch to the user
su  postgres
```

## Start the database server

```
postmaster –D $HOME/pgdb
```

## Open a new terminal window

```
#Switch to the postgres user
su  postgres
```

## Create a database

```
createdb test

#To open the terminal-based front-end to PostgreSQL "test" database type:
psql test
```

## Follow the instructions in the lab material attached to create tables, add/delete/modify values and more
